Free Perimeter

Pest Control

Sign up for our 5 application Perimeter Pest Control and *receive the 5th application for FREE!* This program will provide an insect shield around the outside of your home. It controls such pests as ants, fleas, ticks, spiders, and many more before they have the chance to enter your house.

Because most problems start on the outside, we will pay special attention to areas around your home that provide easy access. We apply an insect spray band 6 to 8 feet wide around the foundation, and 2 feet up the foundation wall of your home.

Free Fall Lime

Treatment

Sign up for our 6 application Lawn Care program and *receive a FREE Fall Lime Application!*

Most soils in our area tend to be more acidic than alkaline. Lime is applied to raise your soil pH. This allows nutrients in the soil to be readily available to your grass.
